Launched by - **Remosens Innovations Metlab LLP**

ABOUT THE PLATFORM

Where Learning Meets Industry

GeoSPATIALS is an online learning and professional platform connecting learners, experts and industry strongly focused on **ACADEMIC UPSKILLING** & **ORGANIZATIONAL CAPACITY BUILDING** of the Geospatial Industry encouraging **Very short Term Training programs** for **In-demand Skills**.

It covers the full discipline meeting everyday growth in Science & Technology: **GIS, Remote Sensing, Photogrammetry, LiDAR, Drone (UAV) Mapping, Surveying and GNSS, GeoAI and Spatial Data Science, Web GIS and Digital Twins**.

WHY IT EXISTS

Students learn the fundamentals; industry runs on a faster-moving toolkit. GeoSPATIALS helps close that gap.

01
Practical Exposure
Move beyond theoretical concepts.

02
Industry Workflow
See how real geospatial projects run.

03
Multi-Disciplinary Skills
Combine GIS, remote sensing, drone and AI.

04
Project Experience
Work on real-world datasets.

ONE PLATFORM, THREE WAYS IN

Learn
Very short term Classroom/ Online Courses, webinars and learning resources.

Connect
Experts, learners, Private and Government organizations.

Explore
Training, internships and job opportunities.

HOW THE ECOSYSTEM CONNECTS

Learners
Learn and explore

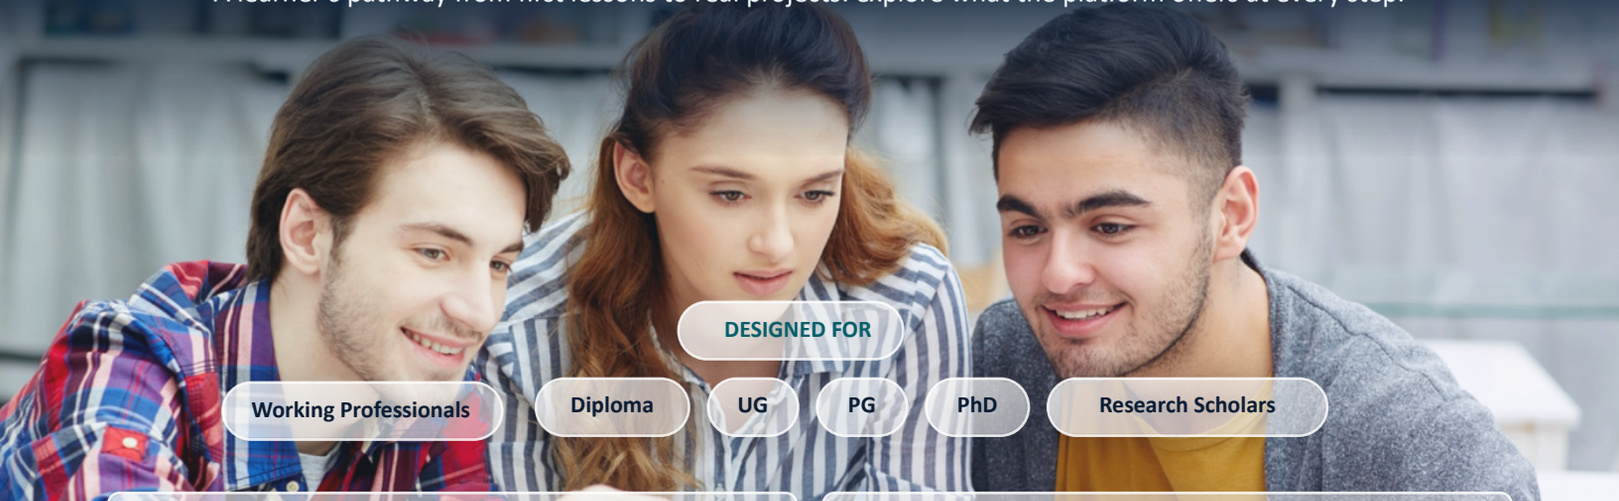

Experts and Mentors
Teach and mentor

Organizations
Post opportunities & get access to unlimited Industry ready resources

FOR WORKING PROFESSIONALS AND STUDENTS

Build Your Skills. Discover Your Opportunities.

A learner's pathway from first lessons to real projects: explore what the platform offers at every step.

DESIGNED FOR

Working Professionals | Diploma | UG | PG | PhD | Research Scholars

Courses and Learning Resources

Explore Classroom/Online courses, technical content and resources to develop geospatial knowledge.

Webinars and Workshops

Learn from industry experts and take part in knowledge-sharing sessions.

Industrial Training

Explore structured training programmes focused on practical skills.

Practical Learning

Build understanding through projects, datasets and hands-on activities where offered.

Internships (Virtual & Onsite)

Discover internship opportunities published by participating organisations.

Jobs and Career Opportunities

Explore relevant openings and connect with potential employers.

FOR COLLEGES & UNIVERSITIES

A world-class Geospatial Lab, built to stay on your campus

A stable campus facility: students learn on industry tools all year, earn credits and get internship-ready.

- **Permanent on-campus GIS & Drone lab**
- **Hands-on Training & Practical sessions**
- **Industry-grade GIS software, Mapping & Surveying Equipment like UAVs | GNSS | ETS | GPR**
- **Credit-linked, internship-ready**

For Students – Earn Credit
For Institute – Strengthen NAAC score

YOUR PATHWAY

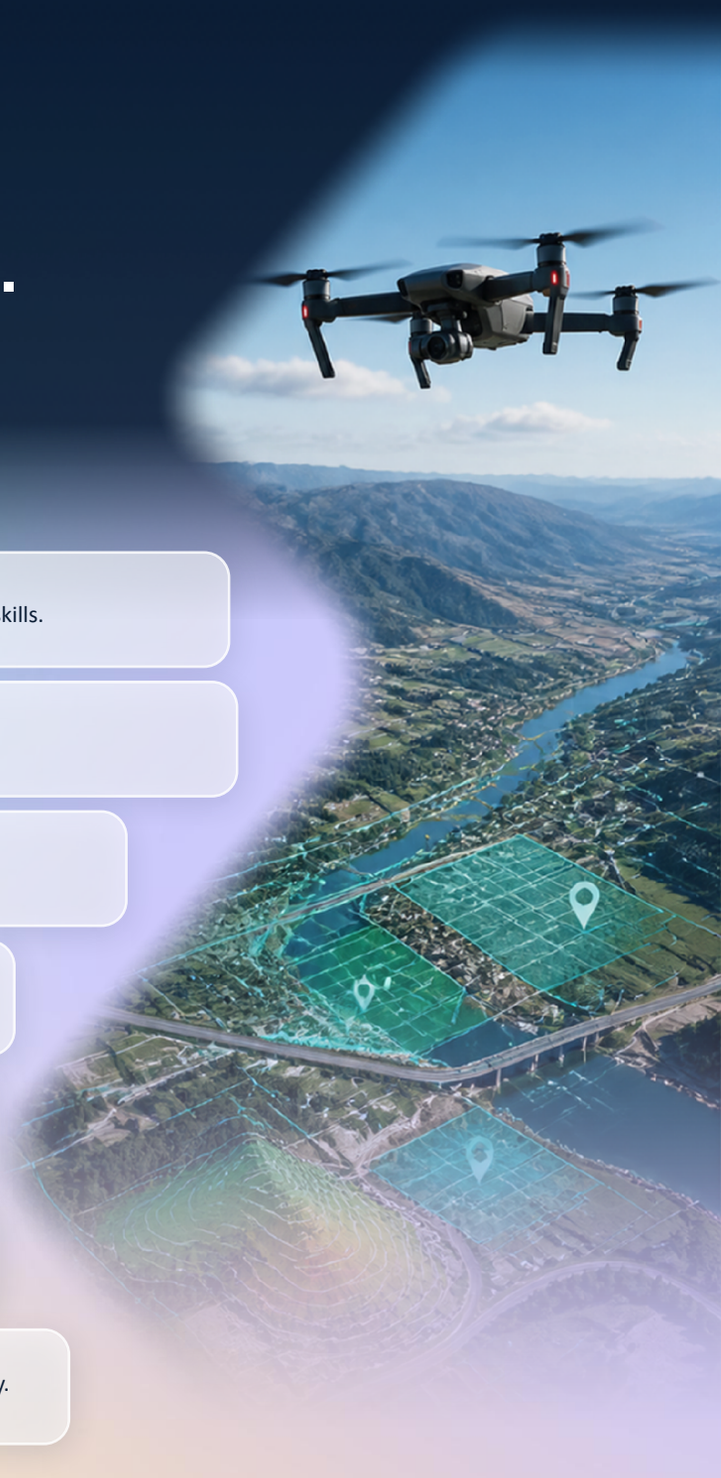

1 Industrial Training → 2 Project Experience → 3 Internship Opportunities → 4 Career Exposure

GeoSPATIALS | Launched by Remosens Innovations Metlab LLP

FOR INDUSTRY EXPERTS, TRAINERS AND MENTORS

Share Your Expertise. Empower Future Talent.

GeoSPATIALS offers industry experts, trainers and mentors a platform to showcase professional expertise, share relevant resources, offer learning programmes, and connect with learners and organizations.

Register professionally
Create a profile describing expertise, experience and technical skills.

Share resources
Contribute relevant learning material and technical knowledge.

Offer courses
Propose or deliver courses and skill-development programmes.

Conduct webinars
Share industry insights through webinars and workshops.

Provide training
Offer industrial training programmes in relevant areas.
Opt for Classroom or Online training opportunities

Mentor learners
Guide learners in building skills and understanding industry requirements.

Connect with organisations
Explore opportunities for collaboration and programme delivery.

SPECIALISATIONS

- GIS & Spatial Analysis
- Surveying & GNSS
- Remote Sensing & Image Processing
- GeoAI & Machine Learning
- Photogrammetry & 3D Mapping
- Web GIS & Web Mapping
- LiDAR & Point Cloud Processing
- Digital Twins & Smart Cities
- Drone Mapping
- Spatial Data Science

HOW IT WORKS

1. Create your profile
2. Submit resources or programmes
3. Connect with learners and organisations

GeoSPATIALS | Launched by Remosens Innovations Metlab LLP

FOR INDUSTRY PARTNERS & ORGANISATIONS

Connect with Talent. Share Opportunities. Grow Together.

Fuel your organization's growth with GeoSPATIALS

GeoSPATIALS empowers organizations across all sectors to build highly skilled, certified geospatial teams. Establish your brand's presence, share vital resources, and publish career opportunities to connect directly with top-tier talent.

Whether you are a dedicated geospatial firm or leverage location intelligence in your workflow, **GeoSPATIALS** is your hub to recruit certified professionals, amplify your industry presence, and share premier career opportunities.

Register

Any Private or Government or NGOs or Research organizations can register

Provide Internship Opportunities

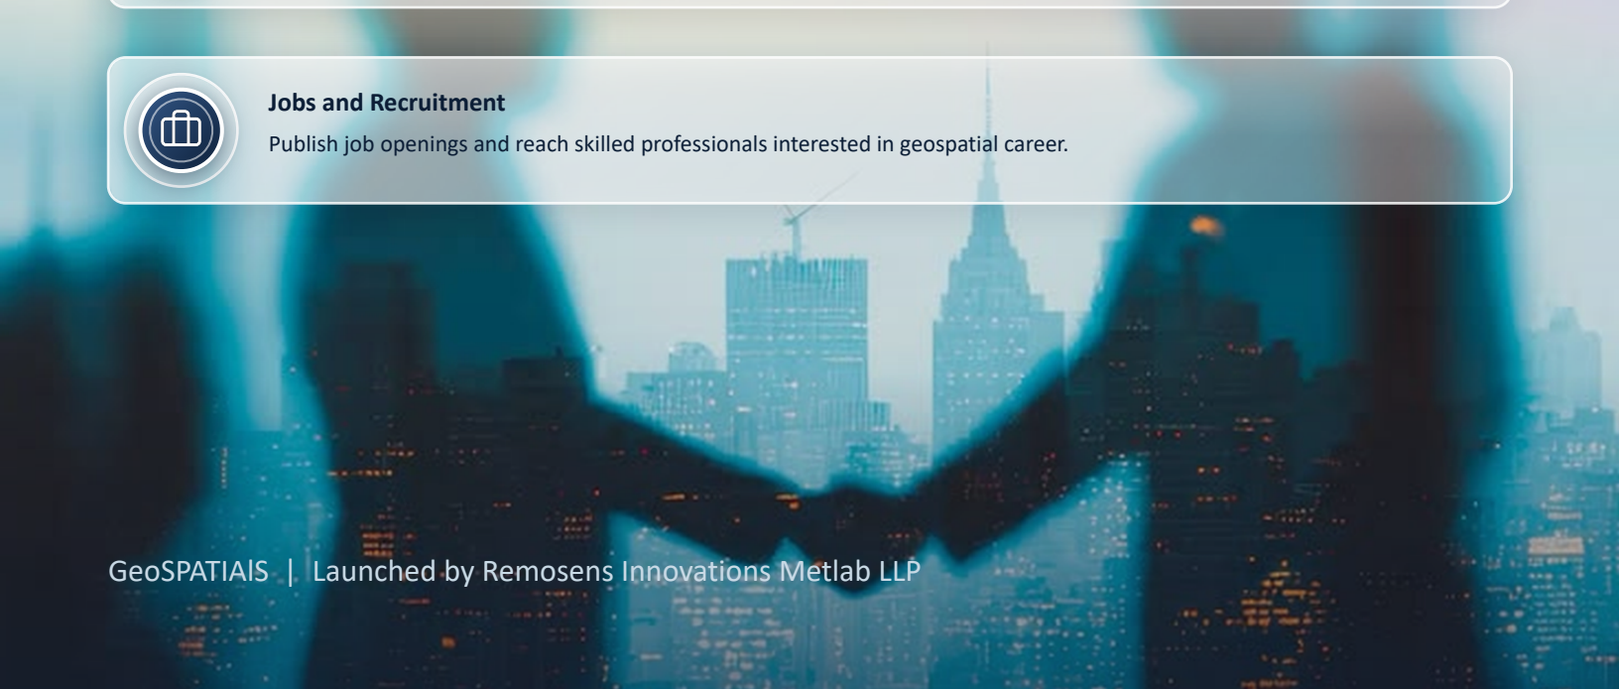

The GeoSPATIALS platform is envisioned to be a pool of skilled resources. For short term assignments, any organisation can hire interns by shortlisting on the basis of required Skillset and duration. It can be on-site or Virtual.

Generate demand for a Course or a Training Program

Any organization can connect with GeoSPATIALS team to design customized training for newly recruited batches or for UPSKILLING of existing professionals.

Jobs and Recruitment

Publish job openings and reach skilled professionals interested in geospatial career.

HIGH-GROWTH APPLICATION SECTORS

Where Geospatial Skills Take You

One technology stack. Multiple career pathways. Global applications.

- Agriculture
- Environment
- Climate
- Infrastructure
- Mining
- Oil & Gas
- Smart Cities
- Disaster Management
- Water Resources
- Forestry
- Space & Earth Observation
- Research

And Much More
